#### Summary of FGN's 2019 Budget Proposal

**Complications on Oil Revenues Tracking and Fiduciary Matters** 

- Nigeria SC, particularly, BL among the most sought after globally.
- Tracking, records and accountability around Nigeria's extractive industry is a nightmare.
- CSOs are not also doing the needful to break the cursory petroleum industry's accountability conundrum.
- Tracking petroleum lifting terms, fiduciary (ORAs) inflows/outflows are journeys the NSAs haven't started...The terms are interesting:

TO,TTA,ATC , ASTMD, KTT, Q&Q, POD, et al.

## Complications on Oil Revenues Tracking...Cont'd

In its latest publication titled, "1993 PSCs: The Steep Cost of Inaction", NEITI called for an urgent review of the PSCs to stem the huge revenue losses to the Federation. Such a review, it said, is particularly important for the federation because oil production from PSCs has surpassed production from JVs. Thus, productions from PSCs now contributes the largest share to federation revenue.

- As noted in the brief: "Between 1998 and 2005, total production by PSC companies was below 100,000,000 barrels per year while JV companies produced over 650,000,000 barrels per year". By 2017, total production by PSC companies was 305,800,000 barrels, which was 44.32% of total production. Total production by JV companies was 212,850,000 barrels, representing 30.84% of total production."
- NEITI explained that the analysis was conducted for the seven producing fields of the 1993 PSCs. These are:
- Abo (OML 125): operated by Eni;
- Agbami-Ekoli (OML 127 & OML 128): operated by Chevron;
- Akp<mark>o &</mark> Egina (OML 130): operated by Total and South Atlantic Petroleum;
- Bonga (OML 118): operated by Shell;
- **Erha (**OML 133): operated by ExxonMobil;
- Okwori & Nda (OML 126): operated by Addax;
- Usan (OML 133): operated by ExxonMobil.
  - After compiling data from the seven offshore fields on oil production, oil prices, cost of development, operating costs, decommissioning costs, and the applicable fiscal regimes, NEITI explained that financial modeling, the standard methodology in the industry, was adopted to estimate revenue in the study.
- The analysis was conducted by changing the fiscal regime of the 1993 PSCs (subsisting regime) to the fiscal regime of the 2005 PSCs. Three estimates were obtained relating to revenues for the 1993 fiscal regime, and two estimates relating to revenues for the 2005 fiscal regime. Two scenarios were considered for the 2005 fiscal regime:

# **Complications on Oil Revenues Tracking...Cont'd**

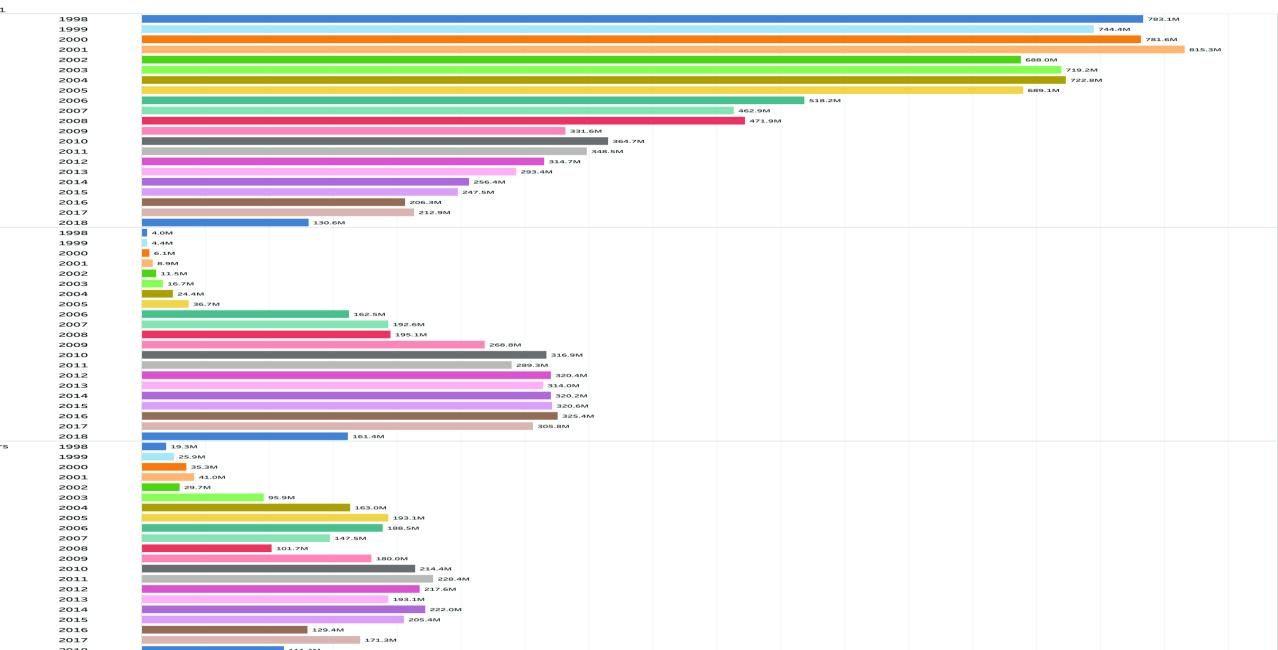

- NEITI said "the 2005 PSCs, were preferred for two reasons, the first, being the terms have better implication for government, as it disallows cost consolidation, pegs cost recovery and mandates payment of royalties on all production irrespective of water depth. This is a departure from the 1993 PSCs that provides for zero royalties at water depths from 1000 meters and above. The Second reason is that, the 2008 review, would have come three years, after the 2005 PSCs. It is, therefore, conceivable that the terms, would have been, at least, at the level of the most current PSCs at that time".
- Though there was a 16 July 2007 letter by DPR to the companies that the govt intended to review the 1993 PSCs, the review was not carried out.
- Thus, as shown in Table 1, three revenue figures were obtained as follows:
- **Total r**evenues using 1993 fiscal regime = \$73.78 billion;
- **Total** revenues using 2005 fiscal regime (scenario 1) = \$89.81 billion;
- **Total** revenues using 2005 fiscal regime (scenario 2) = \$102.39 billion.
- The implication is that revenue would have increased from \$73.78 billion to \$89.81 billion, if the review had simply been done using the 2005 fiscal regime. This implies a difference in revenue of \$16.03 billion. Also, revenue would have increased from \$73.78 billion to \$102.39 billion if the review had been done using the 2005 fiscal regime and government shared in profit oil in OML 127 and OML 130 (PSA). This implies a difference of \$28.61 billion.
- In summary, the results showed that between 2008 and 2017, lost revenue to the Federation owing to failure to review the PSC terms was between \$16.03 billion and \$28.61 billion depending on which scenario one adopts.
- Source: NEITI, Presidency, State House, Abuja

1: Oil Production by Production Arrangement (barrels per year)

# Complications on Oil Revenues Tracking...Cont'd

According to NEITI," putting the losses in project terms, NEITI reported that the lower threshold loss of \$16.03bn to the Federation Account would have funded the Port Harcourt - Maiduguri rail line put at between \$14bn to \$15bn. Other projects that the lost revenue could have been used to fund include the "Mambila Power Plant of 3,050 MW at \$5.72 billion, while the estimated cost of the Ibadan-Ilorin-Minna-Kano Standard Gauge Line is \$6.1 billion. The combined cost of these projects is \$11.82 billion, which is less than the lower threshold of estimated losses.... the Calabar-Lagos Railine (\$11 billion), Fourth Mainland Bridge (\$1.4 billion), Badagdry Deep Water Port Complex (\$1.6 billion), and Lekki Deep Seaport (\$1.2 billion)" the **Publication revealed.** 

Meanwhile, the higher threshold estimate of \$28.61 billion can fund 99% of the proposed federal government budget for 2019.

## **National and Sub-national Taxation Clusters**

#### Federal Government

- Companies Income Tax
- Withholding Tax on companies, residents of the Federal Capital Territory and non-resident individuals
- Petroleum Profit Tax

Offshore Outflows and Connectors to National Infrastructural Projects Through PPPs

#### • NNPC and Offshore (Fiduciary) Outflows

- Blackout of CSOs
- Dearth of fiscal tracking expertise by NSAs
- Connectors to Offshore Agreements for Funding of National Infrastructural Projects through PPPs
- **Poor** interrogative wherewithal by NSAs on the PPPs
- <sup>P</sup> Leaving generations yet unborn with suffocative debts burden...

# **Taxation and Fiscal Justice**

- Tax, Budget and Justice are fiscal varieties
- Fiscal Justice must connect Tax Justice and social equity
- Such leads to effective service delivery:
- -Economic Justice
- -Social equality
- -Human rights and gender equity
- -Social accountability
- -Political right, etc

# Way Forward for Nigeria's Tax Justice Platform

- Prioritizing fair taxation
- Monitoring extractive revenues
- Tracking internally generated revenue
- Seeking justice for victims of human rights abuse, due to unfair taxation or uncivil means of tax collection
- Campaign against tax inequality, due to arbitrarily issuance of tax waivers to the rich, whilst goods of peasant traders are ceased and offices/shops low/medium income earners are locked with excessive tax assessment and imposition
  - Mobilize international pressure, through sustained campaigns globally for responsive tax regime as a human rights obligations of state parties to United Nations Covenants and Conventions and through peer reviews
  - Others

## Recommendations

- Mobilize more citizens (government, private and corporate bodies) into the platform
- Seek constructive approaches to tackle unfair tax practices
- Appoint Voluntary Tax Justice Monitors across several communities and clans across
   Nigeria
- Seek for Tax Violation and Remediation windows with all tiers of government with appropriate MDAs
- Carry out advocacy programs and campaigns to enlighten the citizenry about responsive taxation
  - Demand accountability and effective service delivery to serve as a booster for voluntary tax compliance

Reform Nigeria's Tax Justice Platform and make it sustainable beyond the life of Oxfam's SPP

Introduce innovations into the platform
